

Marion Johnson: General Discussion
Meeting Agenda Points w/ Michael Goodis, RD Director
March 30, 2020

Upcoming Items to be sent to the RD/IO for Concurrence:

- Flonicamid – ISK Bioscience’s First Residential Use (for use by commercial applicators) for sucking insects on shrubs, bushes, roses, etc. The decision memo will need concurrence by the Mike and Rick. Will be provided this week.

- Indoxacarb – FMC petition request to add noncorn to the already registered corn commodities.

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

- Metaflumizone – Import tolerance for pome fruit and citrus.

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

Completed Items of Significance:

- o Thermcell determination letter
- o Hawaii Fruit Fly bait registration near completion after 6 renegotiations to remove ambiguous labeling directives that could have presented harm to non-targets.
- o Spinosad non-PRIA notification urgent request from Monsanto

Chemical Issues/Status:

Aldicarb:

- RD, BEAD, and HED met via conference call last week to discuss AgLogic’s last round submission of stewardship program and production cap proposals.

MosquitoMate:

- Still awaiting HED statistical Analysis as of last week, but it's expected by month's end (i.e, mid-to-late April). HED completed its review of the statistical analysis and has produced a draft memo that is currently undergoing peer review within the branch before being finalized and submitted to the PERC team. Once completed, the PERC team will then review the HED memo and provide its own response document by approximately late April (was formerly mid-March).

GOLD SEALS –

-
- ## Ex. 5 Deliberative Process (DP)

SLITS –

- Met with various OPP representatives working with FEAD, RD, and PRD on the possibility of a SLITS new program formal announcement. Group mentioned that SLITS was in full use by states and that AAPCO through Rose Kachadorian had provided a pronouncement about the new SLITS programs in last October's AAPCO's session.

Notifications/Non-PRIA:

- IVB2 is continuing to make progress with completion of notifications, primarily through the assistance of our new employee.
- Still working with the management group and PMs to develop efforts around the backlog and how registrants and stakeholders can assist.

New Tentative Active Ingredients in IVB2:
